

Cage Mic, suspension design Diesel Creative Team

Inspired by the lamps of miners and workers, Cage is enclosed by a metal cage which here becomes a decorative element and the name of the lamp. The contrast between the glossy surface of the blown glass diffuser and the hand-crafted steel external cage makes Cage unique.

A strong design concept, Cage is a complete collection with floor, suspension and table lamp versions.

In the floor lamp version Cage is available with a glamour white or fashion black diffuser to which a black or white metal cage is applied to achieve a total of four different colour variants. Its light source is what lends Cage its dual soul. When it is turned off the colour of the glass is in black and the glossy surface reflects the geometric shapes of the cage, when it is turned on, the reflected effect disappears and the colour of the glass becomes warmer.

In the Cage suspension version, an original metallic mirror finish bronze version with a brown cage is available as well as the white and black versions. While Cage's black and white versions also suffuse spaces with a soft glow, the bronze diffuser retains its mirror effect and deflects the light, reflecting it totally downwards with its opaque white inner surface. It is available in two sizes which are especially suitable for group compositions.

Like a real building site lamp, the practical Cage table lamp can be hung, moved or placed on any surface or on the floor or it can be used as a quirky desk lamp. With its chromed support, Cage Mic looks a little like a slightly retro microphone. Cage Rocket, on the other hand, resembles a little rocket ready for launching with its tripod base made of the same material as the metal cage.

Cage Mic, suspension technical info

Description

Suspended lamp with diffused light. Hand-blown glass diffuser with glossy finish housed in a cage made of hand-welded steel rod and steel mount, both coated with epoxy powder paint, with silk-screen printed Diesel logo. Canopy with galvanised metal bracket and batch-dyed ABS cover. Electrical cable and ceiling rose: black for the black version, white for the white version. Decentralisation kit available, as well as multiple canopies for compositions up to 9 lamps.

Materials: Blown glass and coated steel or chromed metal

Colours: White, Black

Cage Mic suspension multiple composition

Description

A technical solution that couples function with design harmony: The multiple ceiling flange of Foscarini makes it possible to create compositions up to 9 suspension lamps to create cascades of light of high emotional impact, particularly suitable to enrich a stair case.

The standard multiple flange is designed to suit a large number of suspensions from both Foscarini and Diesel with Foscarini collections.

Materials: Lacquered metal

Colours: White

Multiple canopy

Weight

net kg: 9,00
gross kg: 10,70

Packing

vol. m³: 0,038
n.boxes: 1

Diesel Creative Team

In 2009, Foscarini signed a partnership agreement with Diesel as part of the "Home Collection" home furnishings and lifestyle project. This partnership has given Foscarini the opportunity to make contact with a new target clientele and explore new lifestyles and furnishing trends through a collection conceived by Diesel for its own target group: "Diesel Living with Foscarini".

The Diesel Living with Foscarini collection speaks a range of different languages - from rock to pop, industrial to vintage, graphics to art - to illustrate the unmistakable Diesel lifestyle. Ironic, transgressive, eclectic, incandescent, the collection is made up of over 40 different lamp models. The collection is structured into a range of forms, materials and intended uses, lending itself to unexpected and unconventional settings, from domestic to public environments, always with a strong personality. The materials selected and researched for Foscarini, and perhaps even more so in the Diesel Living with Foscarini collection, are of the utmost importance. Materials which have never before been used in the lighting industry are the collection's added value.
